

SHRUTI SHANKAR

Chennai, India | +91 7305723813 | shruthishankar811@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

I'm a **Python Developer with a strong foundation in Python, SQL, and programming fundamentals**, with hands-on experience in developing practical applications and solving real-world problems. My passion lies in building efficient solutions through logical thinking and problem-solving. I have a good understanding of **Java, Object Oriented Programming, Python, SQL, and Microsoft Excel**, and I continuously strive to enhance my technical skills through practical projects and hands-on learning.

EDUCATION

B.E. in Information Technology — Panimalar Engineering College, Chennai | 2022–2026 | CGPA: 7.9/10

HSC — Periyar Matriculation School, Chennai | 2022 | 62%

SSC — Jaigopal Garodia School, Chennai | 2020 | 57%

TECHNICAL SKILLS

Programming Languages: Python

Web Technologies: HTML5, CSS3, Django

Databases: SQL

Data Visualisation: Power BI, Microsoft Excel

Excel: Data Cleaning, Sorting & Filtering, Formulas & Functions, Pivot Tables, Charts, Data Analysis

Libraries & Tools: Pandas, Numpy, Jupyter Notebook, Git Hub

INTERNSHIP EXPERIENCE

Full Stack Development Intern | Retech Solution Pvt. Ltd. | 2024

- Built responsive UIs using HTML5, CSS3, and JavaScript; integrated backend services and database operations.
- Delivered an end-to-end personal project demonstrating full-stack development capabilities.

TECHNICAL PROJECTS

DeepVeinDetect – Varicose Vein Detection System (*Major Project*)

- Developed a **machine learning-based predictive model** to classify the stages of varicose veins using patient clinical datasets.
- Performed **data preprocessing**, feature selection, and dataset analysis to improve prediction accuracy.
- Applied **classification algorithms** for disease stage prediction and evaluated model performance.
- Generated **data-driven insights** to support early diagnosis and treatment planning.
- Performed model evaluation using appropriate performance metrics to improve prediction accuracy.

Women Safety Analytics – AI Wearable App

- Developed an AI-powered wearable safety application using Mobile APIs.
- Implemented real-time emergency alerts with GPS tracking.
- Processed sensor data for intelligent distress detection.
- Focused on data analysis and real-time decision-making.
